Work Experience

Product Engineer

Imperial Solutions

10-2025 / Present

- Engineered a multi-tenant **Gym Management SaaS** web, backend API, and mobile client with 6-tier RBAC (Admin, Manager, Receptionist, Trainer, Client, Guest) enforcing secure cross-device access.
- Built a **WhatsApp bulk-messaging** engine on Baileys with a scheduling layer using randomized delays and spintax variation to stay within WhatsApp's acceptable-use thresholds.
- Architected a production-grade **Event Reservation API** with JWT auth, refresh-token rotation, email verification, password reset, session management, and RBAC. Prevented ticket overbooking under concurrent load using pessimistic row locking (SELECT ... FOR UPDATE) inside Prisma transactions.
- Wrote 44 integration tests with Vitest + Supertest against an isolated PostgreSQL test database; load-tested with k6 to patch connection-pool bottlenecks. Containerized via multi-stage Docker build and Docker Compose.

Software Engineer

T-Mobile (USA)

06-2025 / 10-2025

- Managed a **Scraping Engine** parsing retail utility email data into analytical spreadsheets.
- Developed a Document Management Module and Dashboard for secure store lease uploads and compliance tracking.
- Architected a multi-tier **hierarchy portal** across all USA stores to manage secure access levels, attendance, and sales metrics on their official software.

React.js/Next.js Developer

Symmetry Digital

11-2023 / 04-2025

- Engineered high-traffic web platforms for enterprise clients (**Jazz, Onic.pk, Tangopay.co.uk**) using Next.js and GSAP animations.
- Single-handedly developed an internal **visual chatbot builder** using React-Flow and Vite.js, reducing technical debt.
- Refactored the core application flow for Onic.pk in Next.js and Chakra UI, slashing production build times by 30%.

React.js Developer

Zapdas Solutions

05-2022 /11-2023

- Identified and resolved critical performance bugs across web applications **Book Better** during active QA testing cycles.
- Built responsive enterprise dashboard layouts from scratch utilizing React and the Ant Design library.
- Integrated backend REST APIs and mapped complex database schemas onto the client user interface.

Skills

Frontend

- React.js, Next.js
- Redux Toolkit, Zustand
- React-Flow, Vite, Axios
- JavaScript (ES6+), TypeScript
- Ant Design, Chakra UI, Material UI
- GSAP, Lenis

Backend & Databases

- Node.js, Express.js(v5)
- PostgreSQL, MongoDB
- Prisma ORM (v6), Postman
- Zod, REST APIs
- Redis, BullMQ

DevOps & Testing

- Docker, Docker Compose
- Vitest, Supertest
- k6 Load Testing, Git

Cloud & Deployment

- AWS, Railway,
- Netlify, Vercel

Browser Extensions & Automation

- Tampermonkey, Web Scraping
- Puppeteer, Playwright

Independent Projects

Global Job Aggregator & Matching Engine

- Built a distributed **Scraping Engine** that centralizes live jobfeedsfrom 20+global platforms (**LinkedIn,Indeed, Glassdoor**etc) viaApI'sand **Tampermonkey** scripts.
- Architected a LANdistribution system allowingmultipleclient machinestosync withacentral hostdashboard for parallelized application workflows.
- Developed an automated**CV scoring algorithm** that parses descriptions to dynamically calculate interview-probability scores (0-100%).
- Created a **Central Admin Dashboard** to manage cross-client job routing, track system states, and audit real-time deployment logs.
